Calibration & Inspection Laboratories

sanas Calibration Laboratory 074

Calibration Certificate

Certificate No: **D25-148 01** **Calibration Date:** **02 May 2025**

Customer: Selago Industries
1 Dombeya Street
Braelyn, East London

Recommended Expiring Date: 02 May 2026
(Customer Instructions 12 Months)

Calibration of: HEIGHT GAUGE **Type:** Digital **Size:** 300 mm

Graduation: 0.01 **Units:** mm

Serial: 2106306 **Manufacturer:** Insize

Basis of Calibration: BS 1643 : 2008 **Calibration Procedure No:** QI 16

Traceable Standards/Equipment used:

Steel Gauge Block Set	Serial No: 11267 / 108111	Cert.No: 505/DM2020
Check Master	Serial No: 410124	Cert.No: D25-001 22

Notes:

Environment: Temperature: 20º C Humidity: 40 To 60%
Receiving Date: 2025/04/24
Issue Date: 2025/05/02
Pre-Calibration Condition: Satisfactory
(See back of page for conditions)

Statement of Calibration

Feature	Permissible Error (mm)	Calibration Deviation (mm)
Parallelism of Measuring Jaw and Scriber to Base	0.005	0.002
Flatness of Base	0.005	0.003
Scale Set Value in mm		
0.00	±0.030	0.000
100.00		0.000
150.00		0.000
190.00		0.000
250.00		0.010
300.00		0.020
Repeatability	Not specified	0.010

Uncertainty of Measurement: ± 29,9 µm

Digitally signed by Izak Francios Jacobus Roos

02 May 2025
Calibration Date:

Calibrated By: I.F.J. Roos

Authorised by: I.F.J. Roos
(Technical Signatory)

Terms and Conditions

This certificate is issued in accordance with the conditions of the approval granted by SANAS (South African National Accreditation System)

Traceability

Instruments and Standards used as per Calibration Procedure are TRACEABLE to NATIONAL and /or INTERNATIONAL STANDARDS.

Validity of Calibration

The values in this certificate are correct at the time of calibration and related to the DUT identified on this certificate. Subsequent accuracy will depend on factors such as transport, handling methods and frequency of use of this equipment. The Re-calibration period of this equipment should be determined to ensure that the accuracy remains within the required limits. Each instrument or gauge member must have the customers own unique serial number.

Uncertainty of Measurement

The reported uncertainty of measurement is based on a standard uncertainty multiplied by a coverage factor of k = 2, which, unless specifically stated otherwise, provides a level of confidence of approximately 95%, the uncertainty of measurement has been estimated in accordance with the principals defined in the GUM Guide of Uncertainty of Measurement, ISO Geneva, 1993

Disclaimer

WISIO cc will maintain a professional standard in its performance of calibration activities. We will not be liable for claims whatsoever arising out of the use, implementation or inability to use any of the results generated on our certificates. The subsequent accuracy will depend on factors such as transport, care, handling and frequency of use.

Copyright

Copyright of this certificate is owned by WISIO cc This certificate may only be reproduced as a complete, exact facsimile of the original, after prior written approval is obtained from WISIO cc.

Certificate signatures

Electronically signed certificates are only valid as an electronic document in *.pdf format where signatures can be verified. All elctronically signed certificates are null and void if printed as a hard copy certificate. Hard copy certificates will be stamped and manually signed

Note: The Metrological confirmation process is the responsibility of the customer.
